

ID02 Priest River Experimental Forest

The Priest River Experimental Forest was established in 1911. It is located in the Selkirk Mountains of northern Idaho and covers 6,368 acres. Research in silviculture, fire, and soils has been conducted there for almost a century. The facilities include four residential buildings, a conference building, a bunkhouse, and an office laboratory. Along with active research, the forest hosts workshops, training sessions, and field trips.

NTN sampling began at ID02 on December 31, 2002. The site is sponsored by the USDA Forest Service and operated by the Priest River Experimental Forest. Robert Denner is the site supervisor and Marrina Frederick operates the site, with Don Shipton as a backup operator.

Site information and photos by Don Shipton
