

MO43 Tyson Research Center

MO43 is located at Tyson Research Center, 20 miles southwest of St. Louis. Washington University Tyson Research Center (not affiliated with Tyson Foods) is a 2,000-acre field station providing opportunities for research, education, and environmental studies. It is a member of the Organization of Biological Field Stations network. The MO43 NADP site is situated in a grassy field at an elevation of 174 meters, and is surrounded by oak-hickory forest. Average annual rainfall is 109 cm (43 inches).

NTN sampling began at MO43 on August 28, 2001. The site is sponsored and operated by Washington University. Dr. Jonathan Losos, professor of biology at Washington University and director of the Tyson Research Center, supervises the site.

David Larson (on the right) is the Field Station Manager at Tyson and the MO43 site operator. Before coming to Missouri, David was the San Dimas Experimental Forest manager and CA42 site operator for over 10 years. Pictured on the left is Steve Bone, backup operator at MO43.
